ABOUT US

M/S Sai Balaji Group of companies has been in the core business of providing Contracting Services for MEP (Mechanical, Electrical & Plumbing) for last 20+ years located in Hyderabad. We are most preferred MEP Contractor for many leading builders across India having Offices in Hyderabad, AP, Bangalore, Mumbai and Delhi. With Growing demand from customers and focus to deliver the best quality, we ventured into Manufacturing of Smart Panel Boards/ Switchboards (PCC, MCC, IPCC, IMCC, Floor Panels etc.) and incorporated M/s. Sai Balaji Power Controls LLP in the year 2025.Our Design is Tested and approved by CPRI as per IEC61439 for short circuit 70KA,IP65 & Temperature rise,

Our Humble Journey

2025 Tested @CPRI for 70KA Short Circuit, IP65, Temperature Rise as per IEC61439

2025 Started Sai Balaji Power Controls LLP For Manufacturing LV Panels, Cable Tray, Bus Ways Etc,.

2019 Started Sai Balaji MEP LLP for Electrical Turn Key Services.

2019 Added Plumbing and Fire Fighting & Alarm Contracting Services.

2011 Registered as Sai Balaji Infra India Pvt Ltd.

2006 Started Sai Balaji Technologies as Electrical Contractor

VISION

To provide cost effective Engineered Smart Panel Boards Solutions to match our customer requirements. Our aim is to adopt complete Modular Design which can fit in as a Plug and Play system in building a high quality Panel board and also adapt to the Space availability. We would also focus on Corporate Social Responsibility by using Energy Conservation Methods and Safety System which meets the International standards.

MISSION

To be most preferred Panel builder for our Client. We empower our clients with efficient, reliable, innovative through our expertise in manufacturing Smart panels.

PHILOSOPHY

We believe in the Philosophy of Consistency in delivering the right product to our customer, which will keep us on top in near future, also Quality in Sai Balaji Power Controls is not a tick box or check box it is our philosophy to spread through every stage of our operations. Our quality goes beyond our certifications - a commitment ingrained in our every endeavor.

QUALITY POLICY

We aim to achieve total customer Satisfaction through manufacture and supply of quality products as per agreed specifications through continual improvement of all our process and Quality Management Systems.

METHODOLOGY

Team Sai Balaji Infra India Private Limited consists of very expertise & experienced professional up to 25 Years of experience. Team provides expertise in all key areas of Panel manufacturing, like Design (Electrical & Mechanical), Planning, Manufacturing, Quality & Execution, which will ensure that our products are best in quality and Safe. All our products that we design and Manufacture are tested as per latest IEC 61439 with NABL accredited laboratories. We maintain very stringent policy in Inspecting the Inward and Outbound Products. Also we maintain very strict policies in selecting Vendors, through vendor inspection and Vendor approval.

We conduct 3 stage inspections for all inward materials.

- Inspection at Vendor Premises / TC
- Physical inspection the moment it reaches at our premises.
- Functional / measurement test at our premises.

We Conduct 3 Stage inspections for all outbound materials.

Each Vertical will go for an inspection for visual and wiring.

Complete panel inspection for Visual and wiring.

Functional test of every panel before dispatching.

Our clients rely on our ability and core capabilities to execute the entire project from design, engineering, supply, testing and deployment till the installation is done onsite. We dispense support services to ensure that operations are not disturbed or stalled. We make our Clients to trust our methodology of work because of our time tested best practices like Delivery of balanced and flexible power offerings that can be expanded for diverse markets. Keeping an eye on the future requirements, we upgrade our values, systems and methodology to meet our clients' requirements of electrification or panel building with branded raw materials.

Timely Delivery

Tested for 70 KA Short Circuit as per IEC61439

Post-Sales Support

Smart Panel

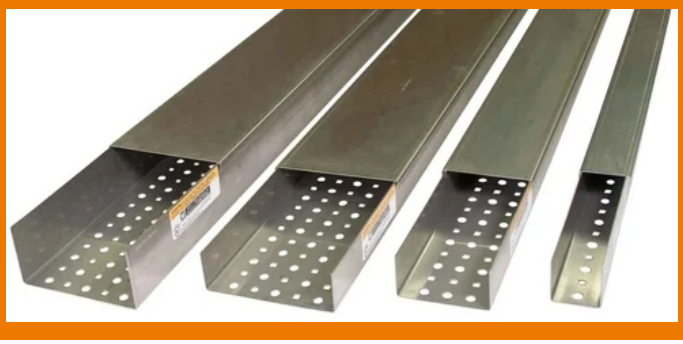

Tested for IP65 As per IEC61439

Tested for Temperature Raise as per IEC61439

PRODUCTS PORTFOLIO

Low Voltage Panel Boards as listed below

- Power Control Centre (PCC) Panels.
- Intelligent Power Control Centre (iPCC) Panels.
- Motor Control Centre (MCC) Panels.
- Intelligent Motor Control Centre (iMCC) Panels.
- DG Sync Panels.
- Auto mains Failure (AMF) Panels.
- Automation Panels.
- Drive Control Panels
- Hybrid APFC Panels
- Thyristor Controlled APFC Panels
- APFC Panels with Detuned Filters.
- Power Distribution Boards (PDB)
- Floor metering Panels.
- Control & Relay Panels (C&R).

CABLE MANAGEMENT SYSTEMS

- Perforated Cable Tray
- Ladder Type Cable Tray
- Race Ways

BUS WAYS

- Air Insulated Bus Ducts
- Conventional Bus Duct
- Sandwich Bus Duct

CPRI Certified IEC61439 70KA Short Circuit Low Voltage Switch Board

Technical Specifications :

Short Circuit Resilience	Short Circuit rating of 70 kA.
High Current Ratings	Available in 5000 A and 6300 A upon request.
Degree of Protection	Multiple IP ratings up to IP 65.
Forms of Design	Choose from 2B, 3B, or 4B Designs

Salient Features :

Fully integrated bolted framework. Modular scalable design. Options for Single front and double front design. Multi-tier compartmentalized Circuit Breaker Panel. Efficient load distribution via ACBs and MCCBS. Supply intake provision for Power Cables as well as Bus Duct systems. .

Perforated Cable Tray

Design : As per IS 1079 :1973, IS 513:1994.
Materials : Mild Steel(MS)/ Pre-Galvanized (GI)
Finish : Hot dip Galvanized / Pre-Galvanized/ Powder Coated.
Thickness : 1.6 /2 / 2.5/3 mm.
Length : 2.5 mtrs
Width : 50/75/100/150/200/250/300/350/400/450/500/550/ 600/700/750/800/850/900/1000/1200mm (Customizable)
Height : 25/40/50/75/100 mm (Customizable).
Punch Pattern : 40X8mm.

Ladder Type Cable Tray

Design : As per IS 1079 :1973, IS 513:1994.
Materials : Mild Steel(MS)/ Pre-Galvanized (GI)
Finish : Hot dip Galvanized / Pre-Galvanized/ Powder
Thickness : Coated.
Length : 1.6 /2 / 2.5/3 mm.
Width : 2.5 mtrs
200/250/300/350/400/450/500/550/600/ 700/750/800/850/900/1000/1200mm (Customizable)
Runner Height : 50/75/100 /120 mm (Customizable).
Rung Size : 30x15, 40x20, 50x20 mm.
Rung Spacing : 300mm Interval (Customizable)

Race Ways

Tray Width	: 50mm to 1000mm
Tray Height	: 25mm to 100mm
Tray Collar	: 15mm to 25mm
Thickness	: 1.6mm to 3.00mm
Material	: Mild Steel(M.S)
Finish	: Hot dip Galvanized / Pre-Galvanized/ Powder Coated.

Busducts Solutions

From 25A lighting Busducts to 6300A LV Busducts System

Smart Troubleshooting

Our Smart Panels are enabled with QR codes, using which a user can access complete drawings & test reports anytime by scanning the code with a Smart Mobile.

It makes installations, maintenance, troubleshooting and technical audits very simpler and easier for us as well as for our customers.

INFRASTRUCTURE

State of art Machinery

The latest machinery (Sheet Metal Processing, Powder Coating, Busbar Processing machinery) are the back bone for our manufacturing expertise. Every piece of material is carefully selected and meticulously maintained to ensure that our manufacturing process is at the forefront of our quality.

NC Control Hydraulic Shearing Machine

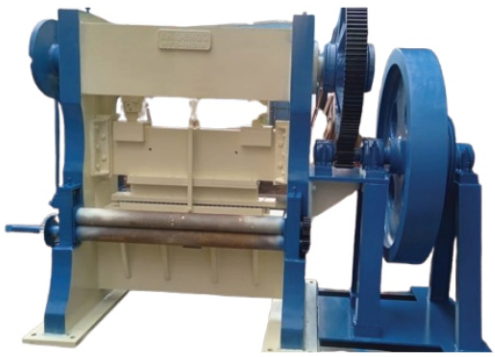

CNC Servo 3 in 1 Bus Bar Processing Machine

100 Ton 7 Axis CNC Hydraulic Press Break

Perforation Machine for Cable Tray Perforation, Punching area up-to 1200mm

Process Expertise

Ensuring every Panel Board manufactured in our factory, exceeds expectations. Continuous training programmers to our team, ensures we are the best in delivering the best panel boards.

Timely Delivery

Our Commitment to efficiency is reflected in our streamlined process from fabrication to assembly to testing. The meticulous transformation of raw material to a smart Panel boards ensures not just quality but also timely delivery.

Packing & Shipping

Our efficiency extends beyond manufacturing, into our shipping section, where timely deliveries are not just a promise but a practice. Our meticulous packing and shipping processes safeguard the integrity of every switchboard until it reaches your doorstep.

Post-Sales Support

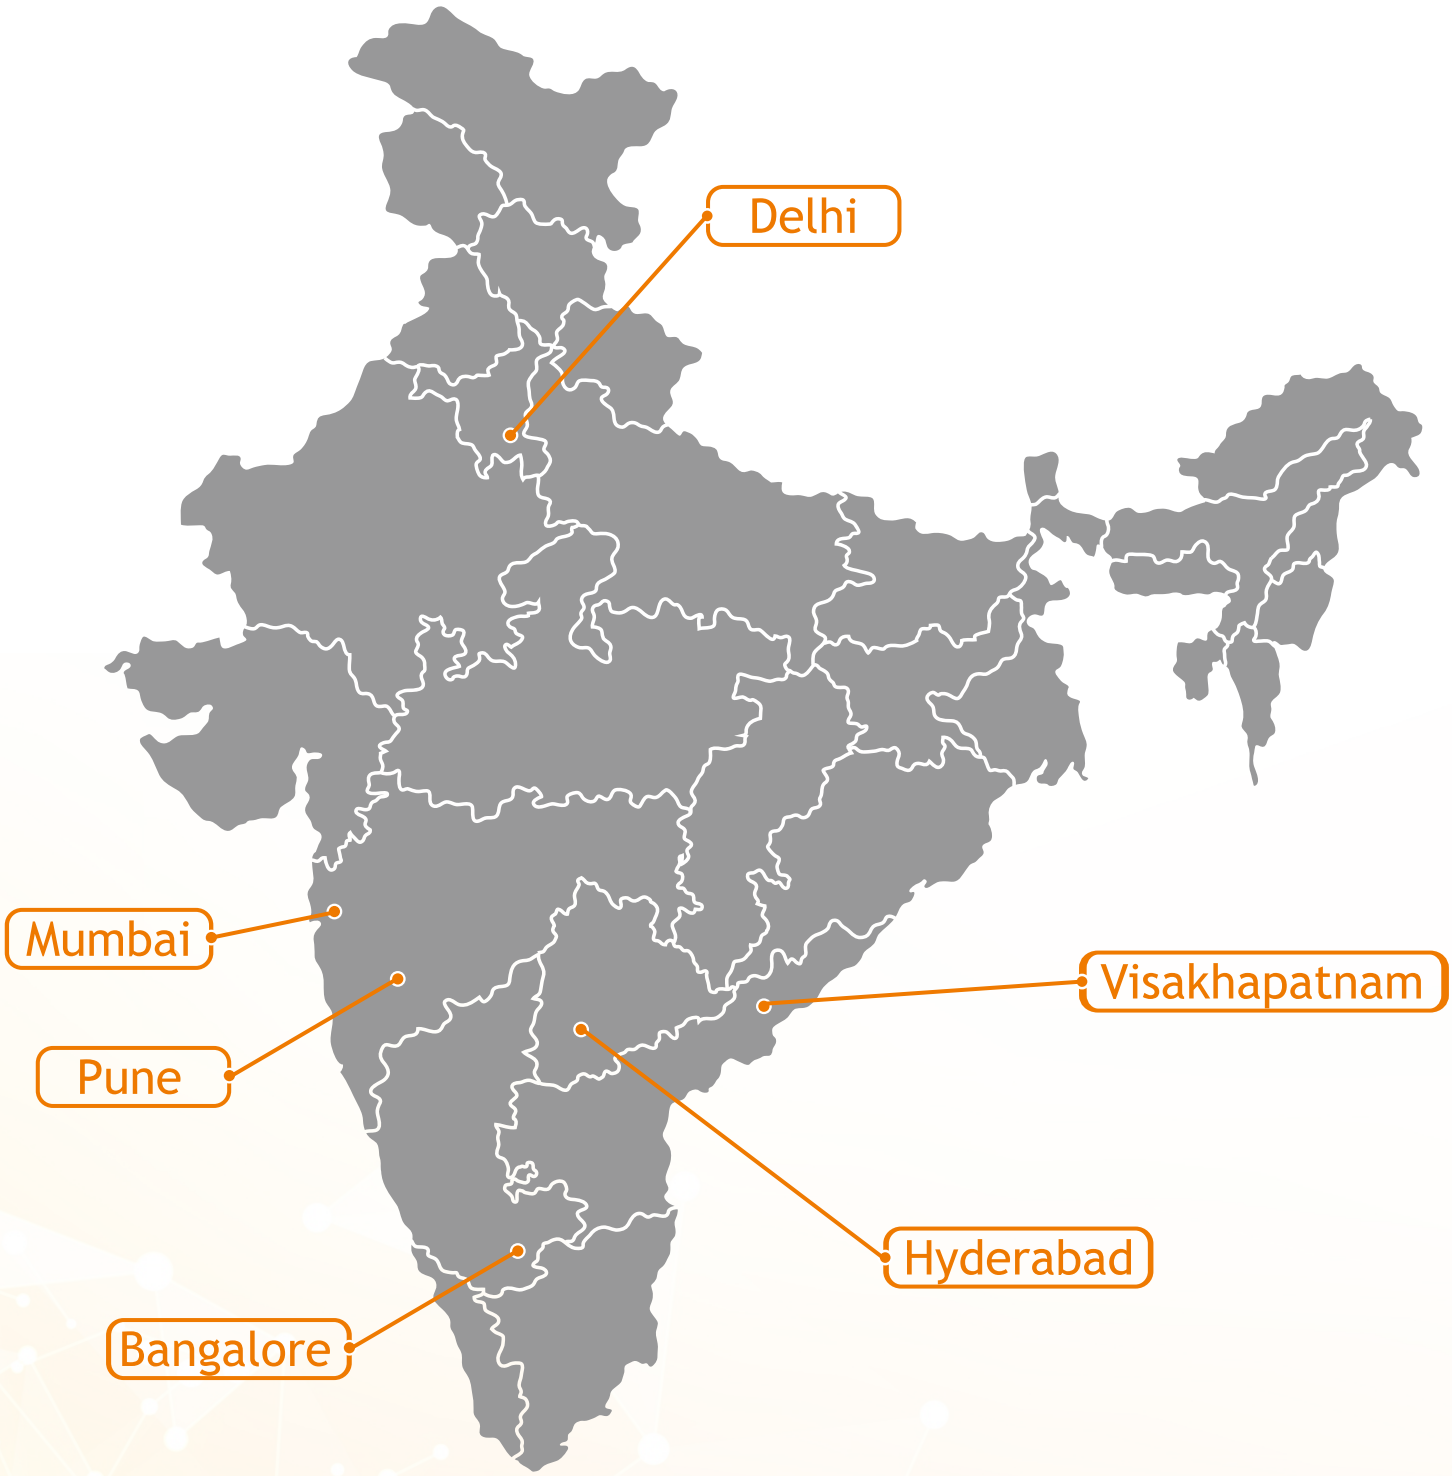

Our commitment extends beyond sales, dedicated post sales / service Engineers ensures seamless operation of control panels. Installation & Commissioning thorough site assessments and precise installation procedure, followed by expert commissioning guarantees to reach seamless performance of panel boards. We will be Providing complete hands on training to our client maintenance team to maintain and operate panels efficiently. Warranty Services, Post installation support with a standard warranty Policy manufacturing defects. We value client feed back in improving our products & Services.
